FOG/Cross-Connection Coordinator

General Statement of Duties

Performs Town of Selma's Backflow, cross-connection, and FOG programs.

Distinguishing Features of the Class

An employee in this position will administer the Town of Selma's backflow and cross connection, and Fats, Oils, and Grease (FOG) programs. Ensure all federal and state codes and local ordinances are followed. Prepares and mails monthly backflow prevention test notices and grease trap cleaning notices. Keep track of all reports turned in by customers. Employee will also work as part of a team engaged in the maintenance of sewer lines, maintenance and repair of water lines and meters. Work involves significant public contact, knowledge of the water and sewer systems, customer service, identifying problems, responding successfully to water leaks, meter malfunctions, sewer clogs, and other similar customer service issues. Work also requires maintenance and repair of water and sewer pumping stations. Employee is subject to working in both inside and outside environments, in extreme hot and cold weather, and exposure to various hazards such as working in heavy traffic, loud noises, vibration, moving mechanical parts, chemicals, fumes, odors, dusts, mists, gases, poor ventilation, and oils. Work is subject to the final OSHA standards on blood borne pathogens. Employee is also subject to on-call and call-back work.

Duties and Responsibilities

Essential Duties and Tasks:

- Track and maintain inventory of all backflow preventers connected to the city's water distribution system.
- Development and implementation of backflow and cross connection program.
- Implementation of the Fats, Oils, Grease (FOG) program.
- Make regular visits to sites that require checks for backflow and FOG.
- Contact customers to ensure compliance with backflow device requirements and ensure appropriate repairs are made as needed.
- Send initial notices, follow-up notices, and final notices to owners of backflow devices for annual testing and maintain records of them.
- Send notices of grease traps to be cleaned and maintain records of them.
- Assists the crew on the maintenance and repair of water and sewer lines, meters, hydrants, valves, and other apparatuses; makes water and sewer taps.
- Inspects, maintains, and repairs water and wastewater pumps; makes mechanical, plumbing, and electrical repairs.
- Inspects, takes readings, backwashes filter, and adjusts chemical feed at wells and water plant; maintains records of work activities; take samples; performs standard tests.
- Installs, inspects, replaces, locates, reads, tests, disconnects, and changes out residential and commercial water meters.
- Operates a specialized truck to remove sewer blockages with a water pressure jet, automated rodding machine, or vacuum pumping apparatus; enters manholes to clean out obstructions following confined space entry requirements.
- Operates construction equipment including back hoes, excavators, and loaders to dig, load dump trucks or for other purposes.
- Locates water and sewer lines and marks them for other utilities and various construction projects; receives location requests through fax machine; locates and marks water and sewer lines.
- Operates video camera to inspect sewer lines for inflow and infiltration problems.
- Stocks and maintains assigned trucks and equipment.

- Maintains accurate databases, files, prepares daily logs and other records.

Additional Job Duties:

- Performs other tasks as required.

Recruitment and Selection Guidelines

Knowledge, Skills, and Abilities:

- Considerable knowledge of the tools, materials and equipment used in the installation, replacement, maintenance and repair of water and sewer lines and appurtenances.
- Considerable knowledge of the hazards associated with working around raw sewage and other work hazards and the associated safety precautions.
- Considerable knowledge of a variety of maintenance and manual methods and tasks involved in assigned work.
- Working knowledge of the municipal water and sewer customer service policies and procedures.
- Working knowledge of the application of information technology to the work.
- Knowledge of mechanical, plumbing, and electrical maintenance and repair of pumping stations.
- Some knowledge of well water plant operations and testing.
- Skill in customer contact and customer service.
- Ability to establish and maintain effective working relationships with supervisors, co-workers, and the general public.
- Ability to operate assigned equipment including back hoes, loaders, and dump trucks.
- Ability to read utility line maps and operation and service manuals and to understand and follow oral and written instructions.
- Ability to keep accurate detailed records.
